DETAILED ACTION

Allowable Subject Matter

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance:

The reference (s) of record do not teach or suggest, either singularly or in combination at least the limitation of a "first electrode, connected between the first type doped semiconductor layer of the first island structure and the second type doped semiconductor layer of the second island structure; and a second electrode, connected between the second type doped semiconductor layer of the first island structure and the first type doped semiconductor layer of the first island structure, wherein a LED is formed by the first electrode, the second electrode and the first island structure, and a shunt diode is formed by the first electrode, the second electrode and the second island structure, wherein the shunt diode is connected in parallel to the LED with an inverse bias compared to the LED" for claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 6,841,802 to Yoo discloses LED chips.

US Patent 6,593,597 to Sheu discloses a flip chip light emitting diode.
